## 1. Document Overview

This document details the PAIN.008.001.02 file format that will be accepted by Bank of Ireland for SEPA Direct Debit Collections.

Bank of Ireland is implementing the industry PAIN formats as outlined by the Irish Payments Service Organisation (IPSO). This document adheres to the following file specification available on the IPSO website:

- ▶ IPSO Customer File Formats V10

### 1.1. Background

SEPA aims to create a single, integrated and standardised payments market across the current 33 SEPA countries in Europe.

Direct debit creditors (originators) must be SEPA compliant by 1st February 2014 in order to continue making electronic non-urgent euro payments (SEPA payments) in Ireland. Further background information is available on our website: <http://bankofireland.com/SEPA>. Bank of Ireland has also published a Direct Debit Readiness Checklist for (direct debit) creditors on the Group website. To ensure you are aware of the changes required within your business please visit: <http://bankofireland.com/SEPA>

### 1.2. Document Purpose

The purpose of this document is to outline the PAIN008.001.02 XML file format that will be accepted by Bank of Ireland.

Knowledge of XML is recommended to interpret this document.

## 2. The Character Set

The PAIN.008.001.02 message format can support a range of characters; the following are the supported characters which are the basic Latin character set:

a b c d e f g h i j k l m n o p q r s t u v w x y z

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 0 1 2 3 4 5 6 7 8 9

/ - ? : ( ) . , ' +

Space

If required, the following characters can also be used in text or information fields only, but must be provided using the XML representation shown.

Special XML Character	XML Representation
& (ampersand)	&amp;
< (left brace)	&lt;
> (right brace)	&gt;
“ (double quotation)	&quot;

e.g. AB & C Transport would populate their name in a PAIN.001, appearing as:

<Cdtr>

<Nm>AB &amp; C TRANSPORT </Nm>

</Cdtr>

Note: Senders must ensure that the content of Identifiers/reference data elements is restricted to the restricted basic Latin character set (across). If non supported characters are used in these fields they may lead to rejection of files or transactions in the payment chain.

Exceptionally, the content of Identifiers/reference data elements

- ▶ Must not start or end with a ‘
- ▶ Must not contain two consecutive ‘/’s anywhere in the data element

These identifier fields include the following:

Mandatory Fields

- ▶ End-to-End Identification (NB: This must be unique within the Batch).  
Mandate Identification
- ▶ Message Identification
- ▶ Payment Information Identification (NB: This must be unique within the File).

Optional Fields

- ▶ Instruction Identification
- ▶ Creditor and Debtor Identification
- ▶ Ultimate Debtor/Creditor Identification
- ▶ Original mandate identification
- ▶ Remittance Information
- ▶ Proprietary Codes

Additionally, the content of Message Identification - Must not contain an apostrophe.

## 3. Field Types

The following section details the type of fields that are contained in the specification document.

-  Mandatory Fields – Fields must be populated or the file/batch/collection will be rejected
-  Optional Fields – Creditor to decide if this field needs to be populated
-  Conditional Fields – The PAIN.008.001.02 file allows the creditor to amend mandate details. Where amendments are made particular fields become mandatory, these fields have been marked as conditional.
-  Payment Information (Batch)/Transaction Level – These fields must be populated at a payment information (batch) or transaction level. Bank of Ireland recommends populating these fields at a payment information (batch) level

Note: There are a number of fields that may be populated at payment information level or at transaction level.

The Creditor Scheme Identification must be populated, and Bank of Ireland recommends populating at payment information (batch) level.

The following fields are optional and, if used, may be populated at payment information (batch) or transaction level;

- ▶ Ultimate Creditor
- ▶ Charge Bearer

## 4. Usage Rules

For a number of fields usage rules must be followed. There are outlined throughout the specification and failure to adhere to these usage rules will result in failed payments / batches / files.

 Usage Rules – can be found in the Grey banners..

## 5. Unused Optional Tags

Where optional tags have not been populated, the tag should be omitted from the file along with its parent tag.

## 6. Batching

Your SEPA Direct Debit file may contain multiple payment batches. It is important to note that the maximum number of batches per file is 50.

Please see the Creditor Guide Section 3.1 for more information. SEPA Direct Debit Creditor Guide.

# SEPA Direct Debit PAIN.008.001.02 XML File Structure

## 7. Tag Depth Structure

In the 'TAG DEPTH' column within the file format table below, each of the 'field name' tags are represented by a '+'.  
These '+' icons represent the depth of the field name tag within the document.

For example:

'+' would represent a Parent Element  
'++' would represent the Child Element of the previous Parent Element

'+++' would represent the Child Element of the previous Parent Element

Tag Depth	Tag Structure
+	<>
++	<> <>
+++	<> <> <>

## 8. File Name

The following rules apply to the file name:

- 8.1. The file name must contain the following reference 'PAIN008'. This may appear at the beginning or within the filename.
- 8.2. The file extension must be '.xml'.
- 8.3. Filename must not exceed 50 characters.
- 8.4. Only alphanumeric characters and the underscore "\_" character can be used in the filename (preceding the file extension '.xml').
- 8.5. Filename must contain no spaces.

Example: 20150628001PAIN008.xml

It is recommended that a unique file name is used for each file. For example, this can be achieved by incorporating a date or sequence number of your own choosing.
