1. Document Overview

This document details the PAIN.001.001.09 ISO 20022 XML file format that will be accepted by Bank of Ireland for SEPA Instant Credit Transfers. This document was compiled with information from European Payment Council (EPC)

1.1. Background

Failure to provide files that meet this specification may result in files and/or transactions being rejected, either by Bank of Ireland or by the beneficiary bank. SEPA aims to create a single, integrated and standardised payments market across the current SEPA countries in Europe.

1.2. Document Purpose

The purpose of this document is to outline the PAIN.001.001.09 XML file format that will be accepted by Bank of Ireland for SEPA Instant Credit Transfers.

Knowledge of XML is recommended to interpret this document.

1.3. SEPA Instant Credit Transfer Requirements

- ▶ When submitting a SEPA Instant payment file, the Local Instrument Code field for each batch of payments within the file must be set to 'INST'. If a single batch Local Instrument Code is not set to 'INST' the file will be rejected.
- ▶ The Instruction Id field must be unique for each payment within a batch of payments. If a SEPA Instant payment file is submitted and multiple payments within the same batch have the same instruction id, only the first payment will be processed, and the rest will be rejected. The Instruction ID is the Debit Narrative that will be shown on the customer account.

2. The Character Set

The PAIN.001.001.09 message format can support a range of characters; the following are the supported characters which are the basic Latin character set:

a b c d e f g h i j k l m n o p q r s t u v w x y z

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 0 1 2 3 4 5 6 7 8 9

/ - ? : () . , ' +

Space

If required, the following characters can also be used in text or information fields only, but must be provided using the XML representation shown.

Special XML Character	XML Representation
& (ampersand)	&
< (left brace)	<
> (right brace)	>
" (double quotation)	"

e.g. AB & C Transport would populate their name in a PAIN.001, appearing as:

<Cdtr>

<Nm>AB & C TRANSPORT </Nm>

</Cdtr>

Note: Senders must ensure that the content of Identifiers/reference data elements is restricted to the restricted basic Latin character set (across). If non supported characters are used in these fields they may lead to rejection of files or transactions in the payment chain.

Exceptionally, the content of Identifiers/reference data elements

- ▶ Must not start or end with a '/'
- ▶ Must not contain two consecutive '/'s anywhere in the data element

These identifier fields include the following:

Mandatory Fields

- ▶ End-to-End Identification
- ▶ Message Identification
- ▶ Payment Information Identification
- ▶ Instruction Identification

Optional Fields

- ▶ Creditor and Debtor Identification
- ▶ Ultimate Debtor/Creditor Identification
- ▶ Remittance Information
- ▶ Proprietary Codes

Additionally, the content of Message Identification – Must not contain an apostrophe.

3. Field Types

The following section details the type of fields that are contained in the specification document.

 **Mandatory Fields** – Fields must be populated or the file/batch/collection will be rejected

 **Optional Fields** – Originator to decide if this field needs to be populated

 **Payment Information (Batch)/Transaction Level** – These fields must be populated at a payment information (batch) or transaction level.

Bank of Ireland recommends populating these fields at a payment information (batch) level;

The following fields are optional and, if used, may be populated at payment information (batch) or transaction level;

- ▶ Payment Type Information
- ▶ Charge Bearer

4. Usage Rules

For a number of fields usage rules must be followed. These are outlined throughout the specification and failure to adhere to these usage rules will result in failed payments/ batches/files.

 **Usage Rules** – can be found in the Grey banners.

Postal Address:

As of the 05th of October 2025 –Structured, Unstructured and hybrid address can be used by the Originators as per usage rules below.

As of the 22nd of November 2026 only the use of structured and hybrid addresses will be allowed (i.e. the provision of unstructured addresses is no longer allowed from this date).

Structured Address:

All new sub elements may be used except Address lines. At a minimum, 'Town Name' and 'Country' must be present and 'Town Name' must have a minimum of one character.

Unstructured Address:

A combination of 'Address Line' and 'Country' is allowed. There are 2 occurrences of 'Address Line'. If 'Address Line' is used, then 'Postal Address' sub-elements other than 'Country' are forbidden.

Hybrid Address:

At a minimum, 'Town Name' and 'Country' must be present. At least one occurrence of 'Address line' is mandatory.

Note:

- ▶ Originator can use Structured, Unstructured and Hybrid address throughout the file.
- ▶ Up to two occurrences of the 'Address Line' tag are allowed as part of a Postal Address.
- ▶ It is mandatory for an Originator to provide either structured, unstructured or hybrid debtor address, as per usage rules above, for any payment where the Beneficiary bank is located in a non-EEA country/territory. Failure to do so will result in these payments rejecting.

Organisation Identification

'AnyBIC' or 'LEI' and / or one occurrence of 'Other' is allowed as the Organisation Identification for a Debtor or Ultimate Debtor.

5. Unused Optional Tags

Where optional tags have not been populated, the tag should be omitted from the file along with its parent tag.

6. Tag Depth Structure

In the 'TAG DEPTH' column within the file format table below, each of the 'field name' tags are represented by a '+'.
These '+' icons represent the depth of the field name tag within the document.

For example:

- ▶ '+' would represent a Parent Element
- ▶ '++' would represent the Child Element of the previous Parent Element

Tag Depth	Tag Structure
+	<>
++	<> <>
+++	<> <> <>

7. File Name

The following rules apply to the file name:

1. The file name must contain the following reference 'PAIN001'. This may appear at the beginning or within the filename.
2. The file extension must be '.xml'.
3. Filename must not exceed 50 characters.
4. Only alphanumeric characters and the underscore "_" character can be used in the filename (preceding the file extension '.xml').
5. Filename must contain no spaces.

Example: 20130628001PAIN001.xml

It is recommended that a unique file name is used for each file. For example, this can be achieved by incorporating a date or sequence number of your own choosing.

8. SEPA Instant File Format

Legend: Mandatory Fields Optional Fields Usage Rules
 Payment Information (Batch) / Transaction Level

Field Name – Tag (No. as referenced in EPC Implementation Guide)	Tag Depth	Content	Mandatory / Optional / Conditional	Description	Data

Payments Information Block – this can occur multiple times within a file						
Field Name – Tag (No. as referenced in EPC Implementation Guide)		Tag Depth	Content	Mandatory / Optional / Conditional	Description	Data
2.16	Proprietary <Prtry>	++++	Yes	Optional	Category purpose, in a proprietary form	Data Type: Text Format: Max length: 35 Min length: 1
2.17	Requested Execution Date <ReqdExctnDt>	++	Empty Tag	Mandatory		
2.18	Date <Dt>	+++	Yes	Mandatory	Date the payee/beneficiary is to receive the payment	Data Type: ISODate Format: YYYY-MM-DD e.g. 1998-03-30
2.21	Debtor <Dbtr>	++	Empty Tag	Mandatory		
2.22	Name <Nm>	+++	Yes	Mandatory	Name of the payer/originator	Data Type: Text Format: Max length: 70 Min length: 1
Postal Address Usage Rule: Postal Address is mandatory if Beneficiary bank is located in a non-EEA country/territory, for example: Andorra, Switzerland, San Marino, Monaco, Mayotte, Jersey, Guernsey, UK, Saint-Pierre-et-Miquelon, Vatican City and Isle of Man						
Postal Address : Refer to section 4 - Usage Rules						
2.23	Postal Address <PstlAdr>	+++	Empty Tag	Optional (see usage rule above)		
2.25	Department <Dept>	++++	Yes	Optional	Identification of a division of a large organisation or building	Format: Max length: 70
2.26	Sub Department <SubDept >	++++	Yes	Optional	a sub-division of a large organization or building	Format: Max length: 70
2.27	Street Name <StrtNm >	++++	Yes	Optional	Name of a street	Format: Max length: 70
2.28	Building Number <BldgNb>	++++	Yes	Optional	Number that identifies the position of a building on a street	Format: Max length: 16
2.29	Building Name <BldgNm>	++++	Yes	Optional	Name of the building or house	Format: Max length: 35
2.30	Floor <Flr>	++++	Yes	Optional	Floor or storey within a building.	Format: Max length: 70

8. SEPA Instant File Format

Legend: Mandatory Fields Optional Fields Usage Rules
 Payment Information (Batch) / Transaction Level

Payments Information Block – this can occur multiple times within a file						
Field Name – Tag (No. as referenced in EPC Implementation Guide)		Tag Depth	Content	Mandatory / Optional / Conditional	Description	Data
2.31	Post Box <PstBx >	++++	Yes	Optional	Numbered box in a post office, assigned to a person or organisation	Format: Max length: 16
2.32	Room <Room>	++++	Yes	Optional	Building room number	Format: Max length: 70
2.33	Post Code <PstCd>	++++	Yes	Optional	Identifier consisting of a group of letters and/or numbers that is added to a postal address	Format: Max length: 16
2.34	Town Name <TwnNm>	++++	Yes	Optional	Name of a built-up area, with defined boundaries, and a local government (See usage rule section 4 above)	Format: Max length: 35
2.35	Town Location Name <TwnLctnNm>	++++	Yes	Optional	Town Location Name	Format: Max length: 35
2.36	District Name <DstrctNm>	++++	Yes	Optional	Identifies a subdivision within a country sub- division	Format: Max length: 35
2.37	Country Sub Division <CtrySubDvsn>	++++	Yes	Optional	Identifies a subdivision of a country such as state, region, county	Format: Max length: 35
2.38	Country <Ctry>	++++	Yes	Optional	Country code Mandatory if Beneficiary bank is located in a non-EEA country/ territory	Format: [A-Z]{2,2}, ISO 3166, Alpha-2 code
2.39	Address Line <AdrLine>	++++	Yes	Optional	Creditor postal address in free format text (See usage rule section 4 above)	Data Type: Text Format: Max length: 70 Min length: 1 Note: Up to two occurrences of this tag are allowed.
Identification Usage Rule – This is an optional field, if being used either Organisation Identification or Private Identification is to be populated						
2.40	Identification <Id>	+++	Empty Tag	Optional		

8. SEPA Instant File Format

Credit Transfer Transaction Information Definition: Set of elements used to provide information on the individual transaction(s) included in the message						
Field Name – Tag (No. as referenced in EPC Implementation Guide)		Tag Depth	Content	Mandatory / Optional / Conditional	Description	Data
2.78	Credit Transfer Transaction Information <CdtTrfTxInf>	++	Empty Tag	Mandatory		
2.79	Payment Identification <PmtId>	+++	Empty Tag	Mandatory		
2.80	Instruction Identification <InstrId>	++++	Yes	Mandatory	Unique identification that the creditor must place on the payment Note: The Instruction Identification must be unique for each payment in the file or only the first payment will be processed.	Data Type: Text Format: Max length: 35 Min length: 1
2.81	End to End Identification <EndToEndId>	++++	Yes	Mandatory	Originator's Reference to the Credit Transfer	Data Type: Text Format: Max length: 35 Min length: 1
Payment Type Information Usage Rule: This is optional and if used, it is recommended to be used at Payment Information level and not at Credit Transfer Transaction Information level. However, if 'Instruction Priority' is populated this field group must be present at 'Payment Information' level and not at transaction information level.						
2.83	Payment Type Information <PmtTpInf>	+++	Empty Tag	Advise to populate at pymt info level		
2.85	Service Level <SvcLvl>	+++	Empty Tag	Advise to populate at pymt info level		
2.86	Code <Cd>	++++	Yes	Advise to populate at pymt info level	Specifies a pre-agreed service or level of service between the parties, as published in an external service level code list	Only 'SEPA' is allowed
2.88	Local Instrument <LclInstrm>	+++	Empty Tag	Advise to populate at pymt info level		
2.89	Code <Cd>	++++	Yes	Advise to populate at pymt info level	Specifies the local instrument	Only 'INST' is allowed
